This action is in response to the application filed 11/07/05.

Reasons for Allowance

1. Claims 1-3 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claim 1 recites producing an electrolytic capacitor using aluminum tetrafluoride as the electrolyte solution, and the moisture content of the capacitor being controlled to less than 0.7%. None of the cited prior art teaches these limitations. The admitted prior art teaches all of claim 1 except for using aluminum tetrafluoride as the electrolyte solution, and the moisture content of the capacitor being controlled to less than 0.7%. Honda (US006219224B1) teaches testing the electrolytic capacitor at increased an humidity and obtaining a resultant moisture content of 0.42%, thus the moisture content was controlled below 0.7% as manufactured, but does not teach aluminum tetrafluoride as the electrolyte. Lessner (US006808615B2) teaches the advantage of phosphate treating an electrode (as in claim 2), but does not teach using aluminum tetrafluoride as the electrolyte solution. Nitta (US006519137B1) teaches the advantages of a cross-linked peroxide butyl rubber seal for an electrolytic capacitor, but does not teach using aluminum tetrafluoride as the electrolyte solution.

Claims 2-3 are allowed as being properly dependent upon allowed claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David S. Blum whose telephone number is (571)-272-1687) and e-mail address is David.blum@USPTO.gov .
